I would like to have a standard search performed using the following SEQ. ID NOs. from application : 09/972,916 (THULE)

SEQ ID NO. 5 (a polynucleotide ~372 nucleotides in length).

NOTE: SEQ ID NO. 5 is a "gene regulatory sequence" which comprises several known promoter/enhancer elements... I am specifically looking for hits that exactly match the full length sequence (i.e. hits that have all of the known elements together, as in SEQ No. 5)

Thanks,
Eric
